

DynaDeck

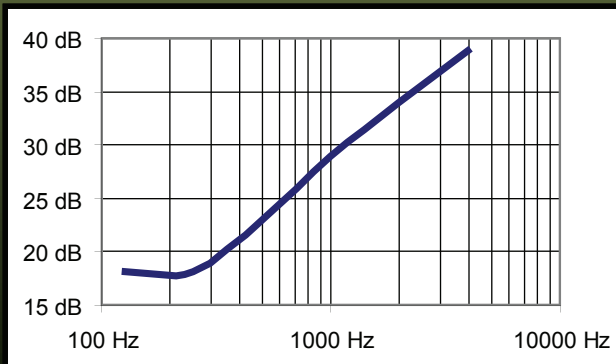

DynaDeck is a waterproof, three part composite carpet replacement combining the high thermal insulation capability of Dynaliner with the low-frequency exhaust noise rejection of DynaPad. The top layer is a durable deep twist embossed vinyl grain that matches the textured floor pattern of vintage cars.

DynaDeck does not absorb water and is ideal for use in street rods, jeeps, convertibles and vintage sports cars where a durable, waterproof floor material is desired. For optimal results, install DynaDeck over Dynamat Xtreme. DynaDeck is available in 54" wide x 3', 6', 9', 12' and 25' long.

- **Durable embossed vinyl mat**
- **High thermal insulation**
- **Does not absorb water**
- **Blocks low-frequency noise**

FOR USE ON YOUR VEHICLE FLOOR INSTEAD OF CARPET
